## About Me

Full Stack Developer with 1.7+ years of production experience building AI-powered applications, workflow automations, real-time systems, and API-driven web platforms. Hands-on experience with n8n workflow automation, Vapi Voice AI, PBX/SIP integrations, REST APIs, webhooks, AI/LLM integrations, and end-to-end application development using React, Next.js, Node.js, and PostgreSQL. Experienced in converting business requirements into automated workflows and production-ready solutions.

## Skills

**Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive & Cross-Browser Design
**Backend:** Node.js, Express.js, RESTful API Design, PostgreSQL, Prisma ORM, MySQL, Socket.IO, Java (OOP, Collections, JDBC)
**AI/Automation:** Generative AI, Agentic AI Workflows, LLM Integration (Claude, Gemini), N8N Workflow Automation, Vapi (Voice AI), Real-Time Systems
**DevOps / Tools:** Git/GitHub, Docker, CI/CD, Vercel, Render, Postman, Agile/Scrum
**Design:** UI/UX Design, Design Systems, Wireframing & Prototyping, Figma, Framer

## Experience

**Full Stack Developer — Syspree** August 2026 – Present
*React, Node.js, PostgreSQL, Prisma, Claude AI, ClickUp Automation, WordPress, Shopify*

- Architected and shipped a full-stack SEO rank-tracking platform (React, Node.js, PostgreSQL/Prisma) automating keyword rank monitoring via third-party API integration, AI-assisted report generation, and an end-to-end workflow automation agent for client report delivery – deployed via CI/CD to Vercel and Render.
- Manage and update content across multiple production client websites built on React, WordPress, and Shopify, ensuring consistent cross-platform UX.

**Jr. Full Stack Developer — Anvex AI** November 2024 – April 2026
*TypeScript, Tailwind CSS, Figma, RESTful APIs, Agentic AI, N8N Automation*

- Delivered three production-grade web platforms (capitorventures.com, capitorinfra.com, kourierx.com) end-to-end from wireframes through live deployment, collaborating cross-functionally with product managers to align UI/UX with business goals.
- Architected an end-to-end Figma design system for Anvex Speak across 8+ screens, and led a cross-platform UI/UX revamp with frontend engineers, cutting design-to-code handoff cycles and enforcing consistency.
- Built an agentic AI calling infrastructure integrating Vapi (voice synthesis), N8N automation pipelines, and PBX/SIP, powering enterprise-scale AI-driven outreach campaigns for 20+ clients.
- Integrated complex backend APIs into a responsive UI for Anvex Vision, building dashboards, data tables, and CRUD workflows for real-time AI processing data.

## Projects

**AI Chatbot – Real-Time Chat Interface** March 2026
*Next.js, Socket.IO, Gemini AI*

- Engineered a full-stack real-time chat application with bidirectional WebSocket communication via Socket.IO and the Gemini AI streaming API, achieving sub-500ms response latency with automatic reconnection and graceful error handling.
- Built a responsive glassmorphic UI with dark/light mode toggle, live typing indicators, and smooth CSS animations optimized for cross-device compatibility.

**Anvex Speak – AI Calling Platform** January 2026
*React, Tailwind CSS, Node.js, Vapi, N8N, PBX*

- Built AI-powered outbound calling workflows using Vapi, n8n, PBX/SIP and Node.js. Automated voice-agent configuration, SIP provisioning and workflow execution through n8n.
- Integrated backend APIs for call status, recordings, analytics and campaign-related data. Developed dynamic variable handling for campaign/customer data and automated data flow between systems.Built a Demo Call Module enabling business teams to configure and test AI calling workflows.

## Education

**Masters Of Computer Applications** 2023 - 2025
Bharati Vidyapeeth Institute of Management and Information Technology
**Bachelor of Science in Information Technology** 2020 – 2023
B.K Birla College of Arts, Science And Commerce
